

TECHNICAL DATA SHEET

COMPRESSOR P 68

High Performance Compressor Oil

DESCRIPTION

Compressor oils for reciprocating, piston air compressors. Formulated by premium base oils and additives to lubricate cylinders of piston type compressors and to prevent oxidation, corrosion and wear. Detergents keep compressor parts clean extending the life of the equipment. Oils are designed to operate in wide temperature ranges. They provide great protection and performance for reciprocating air compressors generating high pressures and discharge temperatures up to 200°C.

APPLICATION & USE

Recommended for reciprocating piston air compressors running up to 200°C discharge temperatures at elevated pressures.

KEY BENEFITS

Excellent Thermal and Oxidation Stability
Excellent Corrosion Protection
Excellent Wear Protection

SPECIFICATION

DIN 51506 (VDL) ISO L DAB
